

Rangeland NRM Alliance

14 Regional NRM organisations collaborating with partners to improve the productive and environmental health of the rangelands.

Introduction

The 14 member organisations represent 80% of Australia's land mass.

The Alliance aims to improve the delivery of NRM at a national level to improve sustainable land management in the rangelands of Australia.

The members see the Alliance as a solution to the difficulties associated with implementing large scale action across regional and jurisdictional boundaries. The driving force behind this group is the recognition that many rangeland issues require a national approach.

The combined resources of the Alliance provide investors, policy makers and partners with services beyond the scope of the individual organisations.

The Alliance members, and partners, use their existing governance and project implementation structures to achieve on-ground results at a national scale.

Members

Purpose

Set and influence the rangeland policy agenda by:

- providing members and partners with a platform for networking and communicating
- developing an integrated body to represent rangeland NRM
- developing a vision for the rangelands with key issues and delivering solutions
- demonstrating and delivering nationwide collaboration

Action through collaboration

The Alliance provides a forum to:

- collaborate with partners
- explore new ideas and possibilities
- develop and deliver projects
- provide feedback on policy and programs
- collate information across the country
- coordinate interaction of NRM bodies and other organisations, agencies or programs
- coordinate delivery through the regional bodies

The Alliance provides a number of advantages to projects including collating information, coordinating interaction of NRM bodies and organising delivery through the regional members and partner organisations.

Project	Alliance Role
Australian Invasive Cactus Network	Provided access for evidence from multiple jurisdictions to be collated
The Australian Rangeland Initiative	Lead the development of this 25 year investment strategy for rangeland NRM
NRM Planning for Climate Change	Provided guidance to Department regarding rangeland NRM needs. Provides support to project management and guides NRM involvement
NRM Spatial Hub	Key partner in project development and delivery.
Policy Forums	Working with Pew to develop forums with rangeland interest groups and industry groups to develop agreed policy positions

Working together to promote and protect the heart of Australia
